Abstract

aaa

1 Introduction

What problem did you address in the project? Why is this problem interesting? What can we learn by solving the problem?([American Psychological Association, 1983](#))

2 Theory

Present relevant theoretical background, with a focus on those concepts and methods that were not covered in the course.

3 Data

What data did you use in your project? How was this data created? What preprocessing did you do (if any), and why?

4 Method

Explain how you approached the stated problem. Aim to be detailed enough for others to reproduce your results. If necessary, refer to your code.

4.1 AAA

subsection 1 here

4.2 BBB

subsection 2 here

5 Results

Present your results in an objective way. Use tables and charts, but do not forget to also include a summary in text form.

6 Discussion

Analyse your results. Discuss the limitations of your work. Compare your study to related work, such as internet materials or scientific articles.

7 Conclusion

Summaries your analysis. To what extent did you solve your stated problem? What else do you take away from your project?
